1- AN INFLATABLE WINGSAIL

Rigid wings are the future... The America's Cup has proved that. Yet away from the world of racing, cruisers also need to be able to dump and to reef the sails easily. This rig aims to do this. It's called the IWS (Inflated Wing Sails). It stays stable in all types of wind conditions, needs no complex fittings (no winches, halyards or shrouds) and the telescopic mast in particular helps to make it easy to dump or reduce the sails...

You can discover the concept at www.inflatedwingsails.com

4- OPENING DECK HATCHES

Vetus is continuing to develop its range of Magnus deck hatches and is offering different sizes so as to be able to respond to all requests. More effective hatches, with tinted glass and a satin, anodized frame which opens to 180°. They naturally open from the inside and the outside and come in many different sizes

More info here: www.vetus.com

2- MOTORIZED FURLING SYSTEMS

To help simplify your sail handling, Profurl is launching a new range of motorized furlers. Furling a foresail is now even easier with the remote control (wired or radio-controlled). There are several advantages: ease of use; clutter-free; no maintenance and a self-locking mechanism...

The NDE2 range of furlers is designed to be fitted on boats from 9m to 22m, with prices starting at €3,750 ex-tax

For more info: www.profurl.com

5- SUPPORTS

Assea specializes in aluminum supports for solar panels. This team of catamaran fans specializes in working on our favorite boats, and proposes different solutions for installing your solar panels, whether it's on a rigid or canvas bimini, or on the davits...

Assea's latest project was to find a solution for Heliolive, a cat which is totally powered by solar energy. 5.5 kW of panels to power the two 65kW Torqueedo motors...

3- PHOTOVOLTAIC CLOTH

Solarcloth System continues to develop, and is now offering photovoltaic cloths which are capable of recharging your batteries. It could be your mainsail, fabric biminis, lazy bags or even a sun awning. They are light (210g to 400g/m²), and these solar cloths are flexible and easily furled.

Check it out here www.solarclothsystem.com

6- MOB BRACELET

This MOB OLAS bracelet alerts you in the event of a man overboard. If the bracelet (and whoever is wearing it) falls into the water, an alarm sounds and the GPS coordinates of where it took place are sent to a smartphone, which can then guide you in to save the person. Easy to use and useful!

Weight: 20 g - Price: 59 euros ex-tax

Find out more here: www.accastillage-diffusion.com

7- MUSTO MPX

Musto has just refreshed its MPX range (launched in 1995), offering even more effective Gore-Tex clothing. MPX now has Offshore, Race and Coastal ranges, depending upon every sailor's needs. The MPX Gore-Tex Pro Offshore Smock jacket starts at €579. Sizes XS to XXL.
